To Whom It May Concern

RE: REFERENCE FOR SEITECH LTD

Seitech were recently engaged to undertake seismic strengthening to a property in Queen Street, Auckland.

The project was of a complex multi-faceted nature that required a staged approach working both during the day and out of hours. Work carried out of hours was in a public area and was always left clean, tidy and safe for business to continue as usual the next day.

A number of variations occurred owing to existing building services and discrepancies with the existing building drawings. These variations were resolved swiftly due to Seitech's proactive coordination with the structural engineer and incumbent service providers.

Seitech completed the Contract Works without defects and/or any health and safety incidents and I would not hesitate to recommend their services to future projects.

Yours sincerely

THE BUILDING INTELLIGENCE GROUP

Warren Wilks
