To Whom It May Concern

I would like to thank Seitech Ltd and their management for their workmanship and professionalism, on the work they carried out at Somerville Intermediate School.

The company (Seitech Ltd) put a program to the school to do steel work covering the delivery of materials and Safety and management plan. They worked out of hours with security and lock down issues such as smoke alarms and alarm systems and noise problems with neighbours.

It was great to work with a company that worked safely, and were clean and tidy on site at all times. Every time they left the site it was clean and tidy.

The work was undertaken in an operating school, so time management, safety, cleanliness and tidiness were extremely important. The work zone and equipment when finished for the day was left safe and taped off for the school day.

I have worked in the industry for some 25 years myself. The work carried out by Seitech was left as though the steel work was new. It was as though nothing was done. All work was cleaned and painted like the rest of the steel work.

I would not hesitate employing the company (Seitech Ltd) to do our steel work again, if and when we require something to be done.

If you would like to ring me I would be happy for you to do so.

Yours faithfully

Gavin Green
